

SHUBHAM GAYKE

DevOps Engineer & Cloud Engineer

shubhamgayke9860@gmail.com | +91 9168469745 | [GitHub](#) | [LeetCode](#) | [HackerRank](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

DevOps Engineer focused on making infrastructure and delivery pipelines reliable, secure, and easy to scale. Comfortable owning a system end-to-end — provisioning and automating cloud environments, containerizing and orchestrating workloads, and building CI/CD pipelines that let teams ship confidently and often. Equally hands-on with monitoring, logging, and access controls, with an eye for cutting deployment time and operational overhead rather than just keeping the lights on. Currently extending that automation mindset into AI-driven tooling — building agentic workflows and MCP-based integrations that take repetitive engineering work off people's plates.

TECHNICAL SKILLS

Cloud & Infrastructure AWS, Microsoft Azure, Google Cloud, CloudFormation, Terraform, Ansible	Containers & Orchestration Docker, Kubernetes, Podman, Helm
CI/CD & Deployments Git, GitHub, GitLab, Jenkins, GitHub Actions, ArgoCD, Blue-Green, Canary Deploy, Rolling Update, Zero Downtime	Architecture & Scaling Microservices, Monolith, Auto Scaling, Horizontal/Vertical Scaling, Stateful/Stateless, Service Discovery, Redis (Cache), CDN
Networking & Security DNS, HTTP/HTTPS, TCP/IP & UDP, SSL/TLS, NAT & VPN, Firewall, CIDR / Subnet, Health Checks, RBAC	Web Servers & Proxies Nginx, Apache HTTP, HAProxy, API Gateway, Reverse Proxy, Load Balancer
Messaging & Event Streaming Apache Kafka, RabbitMQ, Amazon SQS, Amazon SNS, ActiveMQ	Programming & Monitoring Python, Bash Scripting, JavaScript, Prometheus, Grafana, SonarQube

AI & Automation

LangChain, n8n, GitHub Copilot, Claude AI, Prompt Engineering, AI Agents, Multi-Agent Systems, MCP Servers, Vector Search

DEVOPS PROJECTS

Automated CI/CD Pipeline & Multi-Cloud Deployment

- Designed and implemented a fully automated CI/CD pipeline using GitHub Actions, Jenkins, and Docker to deploy microservices across AWS and Azure, reducing deployment time by 40%.

Tech Stack: GitHub Actions, Jenkins, Docker, AWS, Azure, Bash

Infrastructure as Code Automation & GitOps

- Built scalable cloud infrastructure using Terraform and Ansible; implemented a GitOps workflow for Kubernetes deployments, ensuring environment consistency and automated rollbacks.

Tech Stack: Terraform, Ansible, Kubernetes, GitOps, Python, Linux

Kubernetes Cluster Monitoring & Logging

- Deployed a centralized monitoring and logging stack using Prometheus, Grafana, and the ELK stack, with custom alerts for resource utilization that reduced system downtime.

Tech Stack: Prometheus, Grafana, ELK, Kubernetes, NGINX, RBAC

CERTIFICATIONS & BADGES

- | | |
|---|--------------------------|
| • Oracle Certified DevOps Professional | Verify ↗ |
| • Oracle AWS Certified Architect Professional | Verify ↗ |
| • AWS Solution Architect (Udemy) | Verify ↗ |
| • Microsoft Azure Certification & Achievement | Verify ↗ |
| • Google Cloud Platform Skills and Badges | Verify ↗ |
| • Microsoft AI Skills Fest 2026 | Verify ↗ |
| • SQL (Advanced) — HackerRank | Verify ↗ |
| • REST API — HackerRank | Verify ↗ |
| • Deloitte — Technology Job Simulation | Verify ↗ |

EDUCATION

B.Tech in Computer Science Engineering — DBATU -- CGPA: 8.12

Diploma in Computer Engineering — MSBTE— 92.17% *1st Rank in Polytechnic Final Year*

Secondary School Certificate (SSC) — Maharashtra State Board 86.40%

Community Member - AWS Emerging Talent CommunityMember | Oracle Education University
